Everhart Advisors Announces Publication:

The 401(k) Owner's Manual

A Blueprint for Designing and Maintaining an Elite 401(k) Plan for Your Employees

Preparing Participants. Protecting Fiduciaries

Publisher iUniverse awards its "Editor's Choice" designation to the book of 401(k) best practices for plan sponsors and fiduciaries.

Dublin, OH (July 17, 2017)—Everhart Advisors, a Dublin, Ohio, retirement plan advisory firm recognized as one of the top 100 plan specialists in the United States, has published *The 401(k) Owner's Manual* by co-authors Scott Everhart and Brian Hanna, with contributor Rob Shwab. The book is an essential guide for plan sponsors who want to design and maintain an elite 401(k) or 403(b) program that gives employees the best chance to achieve a secure and comfortable retirement, while maximizing fiduciary protection.

According to Scott Everhart, President of Everhart Advisors, "we wanted to share best practices from our perspective as independent consultants and set out for the public our view of what plan sponsors should expect from their plan advisor and other providers. We think this is the only recent 401(k) book to delve into the web of interlocking provider interests and reveal the potential conflicts that can undermine prudent fiduciary decisions."

The 401(k) Owner's Manual explains how to avoid the plan weaknesses that could lead to employee complaints and DOL investigations. As retirement plan specialists with over sixty years of combined experience, the authors are uniquely qualified to reveal and analyze the secrets of plan pricing, effective employee education and monitoring of plan investments.

Industry professionals and service providers should consult this book to learn how to assist fiduciaries through vendor and investment selection. If you are responsible for selecting a new provider for your plan, *The 401(k) Owner's Manual* will explain how to manage a seamless plan conversion and vendor change to reduce fiduciary risk and immediately improve participant outcomes.
